DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-9, 11-15 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Heck, 6,083,207, for the same reasons as described in Office action dated August 11, 2002.

Response to Arguments

Applicant's arguments filed November 14, 2002 have been fully considered but they are not persuasive.

Applicant argues that element (300, described as a dilator, catheter or other medical device) is not part of the hemostasis valve described by Heck, see page 2, lines 4-9. In response, Examiner asserts that the reference discloses a compressible valve sleeve (300) as claimed by Applicant, and thus anticipates Applicant's claims. It is irrelevant whether or not the reference describes element (300) as being part of the hemostasis valve.

Applicant also argues that the claims require that the proximal end of the compressible valve sleeve extends so that it is adapted to receive the distal end of a medical device, see page 2, lines 18-24. In response, Examiner asserts that since a catheter (300) has a lumen, the catheter is adapted to receive another medical device.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
